DATA LOADERS

**We have dozens of
DATA LOADERS
for every major QAD process**

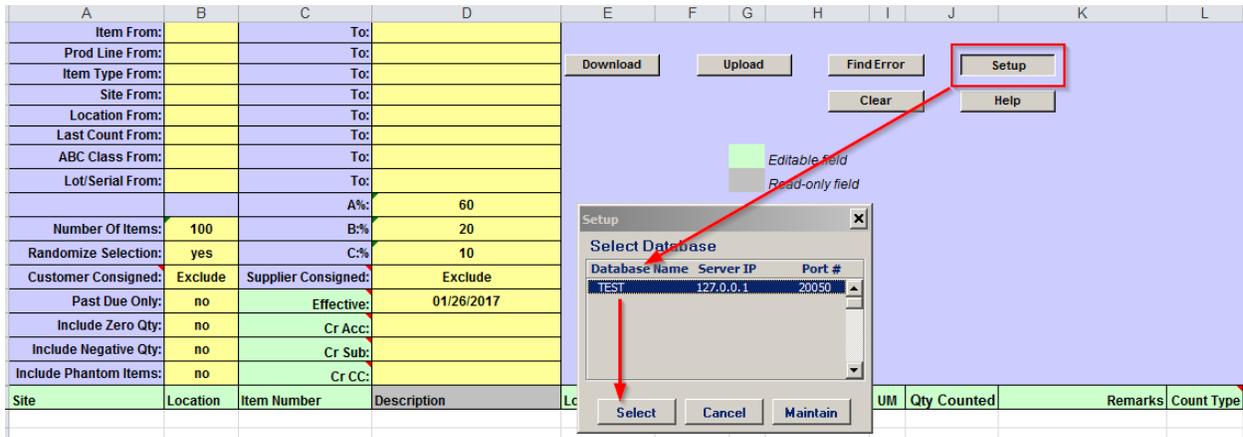

-  Master Data & Inventory
-  Distribution & Supply Chain
-  Finance
-  Production

To browse a complete list of Data Loaders, [click here](#).

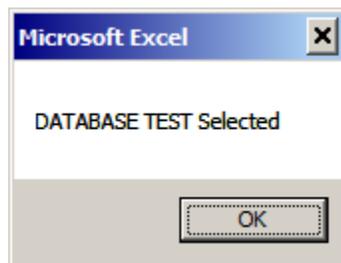

3.14 (SE) and 3.13.2 (EE) Cycle Count Results Entry Data Loader User Guide

Set Up

1. Open up the Loader and check that correct database is set up. Click on the [SETUP] button to open the window and highlight the correct database. Click on [SELECT] when done.

- Pop Up Window will be displayed showing available databases from which to select.
- Highlight desired database and click on the [SELECT] button
- Message will be displayed showing database selected. Click [OK] to continue.

Cycle Count Results Entry

- You can use this Loader to enter Cycle Count Results for many inventory records in QAD. First you need to download the inventory records which need to be counted by entering in the search criteria in the yellow highlighted fields.

	A	B	C	D	E	F	G	H	I	J	K	L
1	Item From:		To:									
2	Prod Line From:		To:									
3	Item Type From:		To:		Download	Upload	FindError	Setup				
4	Site From:		To:									
5	Location From:		To:									
6	Last Count From:		To:									
7	ABC Class From:		To:									
8	Lot/Serial From:		To:									
9			A%:	60								
10	Number Of Items:	100	B%:	20								
11	Randomize Selection:	yes	C%:	10								
12	Customer Consigned:	Exclude	Supplier Consigned:	Exclude								
13	Past Due Only:	no	Effective:	01/26/2017								
14	Include Zero Qty:	no	Cr Acc:									
15	Include Negative Qty:	no	Cr Sub:									
16	Include Phantom Items:	no	Cr CC:									
20	Site	Location	Item Number	Description	Lot/Serial	Reference	ABC	System Qty	UM	Qty Counted	Remarks	Count Type

Search parameters are available for the following fields:

- Item:** enter range of Items or leave blank for all
- Prod Line:** enter range of Item product lines or leave blank for all
- Item Type:** enter range of Item Types or leave blank for all
- Site:** enter range of Sites or leave blank for all
- Location:** enter range of Locations or leave blank for all
- Last Count date:** enter date range or leave blank for all
- ABC Class:** enter ABC Class range or leave blank for all
- Lot/Serial:** enter range of lot/serial numbers or leave blank for all
- Number of Items:** enter number of items to download
- A%,B%,C%:** enter percentages for each ABC class from the total Number of Items to download. The difference to 100% will be used for other ABC classes than A or B or C
- Randomize Selection:** enter "yes" to have a randomized selection of the items to be counted, or "no" to get next "number of items" to be counted, based on last count date and item.
- Customer Consigned:** enter "Exclude" to not report customer consigned inventory, "Include" to report both consigned and non-consigned inventory, "Only" to report only customer consigned inventory
- Supplier Consigned:** enter "Exclude" to not report supplier consigned inventory, "Include" to report both consigned and non-consigned inventory, "Only" to report only supplier consigned inventory
- Past Due Only:** enter "yes" to report only items which are due to be counted (today - last count date > Item/Site Cycle Count Interval); enter "no" to report any item, regardless of last count date.
- Include Zero Qty:** enter "yes" to include zero inventory records, "no" to exclude them
- Include Negative Qty:** enter "yes" to include negative inventory records, "no" to exclude them
- Include Phantom Items:** enter "yes" to report phantom items inventory, "no" to exclude them

Note: there are a few other fields in the header (Effective, Cr Acct, Cr Sub and Cr CC), these are used for Upload (Counting), not download. You can hover the mouse over these fields to read instructions:

A	B	C	D	E	F	G	H	I	J	K	L

QAD login

User ID:

Password:

Domain:

- Enter QAD User ID, Password and Domain
- Select [LOGIN] button to continue.

Please note: if provided credentials are incorrect or the user is not authorized to use transactions in menu 3.14 (3.13.2 for EE) in QAD, the database connection will not be established and the QAD login window will reappear.

- The Data Loader will display data based on the search criteria. A message will indicate whether a download was successful or not:

Site	Location	Item Number	Description	Lot/Serial	Reference	ABC	System Qty	UM	Qty Counted	Remarks	Count Type
10	200	02-0001	CONFIGURED DISPLAY RACK			A	10.0 EA		0.0		I
10	200	02-0005	MECHANICAL PENCIL (5MM) BLI			A	3.0 EA		0.0		I
10		1-120/119	Ring, Retaining Internal Steel			A	4.0 EA		0.0		I
10	100	1-120/119	Ring, Retaining Internal Steel			A	2.0 EA		0.0		I
10	inspect	1-20001	Final Asm 1 KB Item1			A	33.0 EA		0.0		I
10		88-100	CASE,AUTO-UNIT			B	8.0 EA		0.0		I
10	inspect	88-100	CASE,AUTO-UNIT			B	2.0 EA		0.0		I

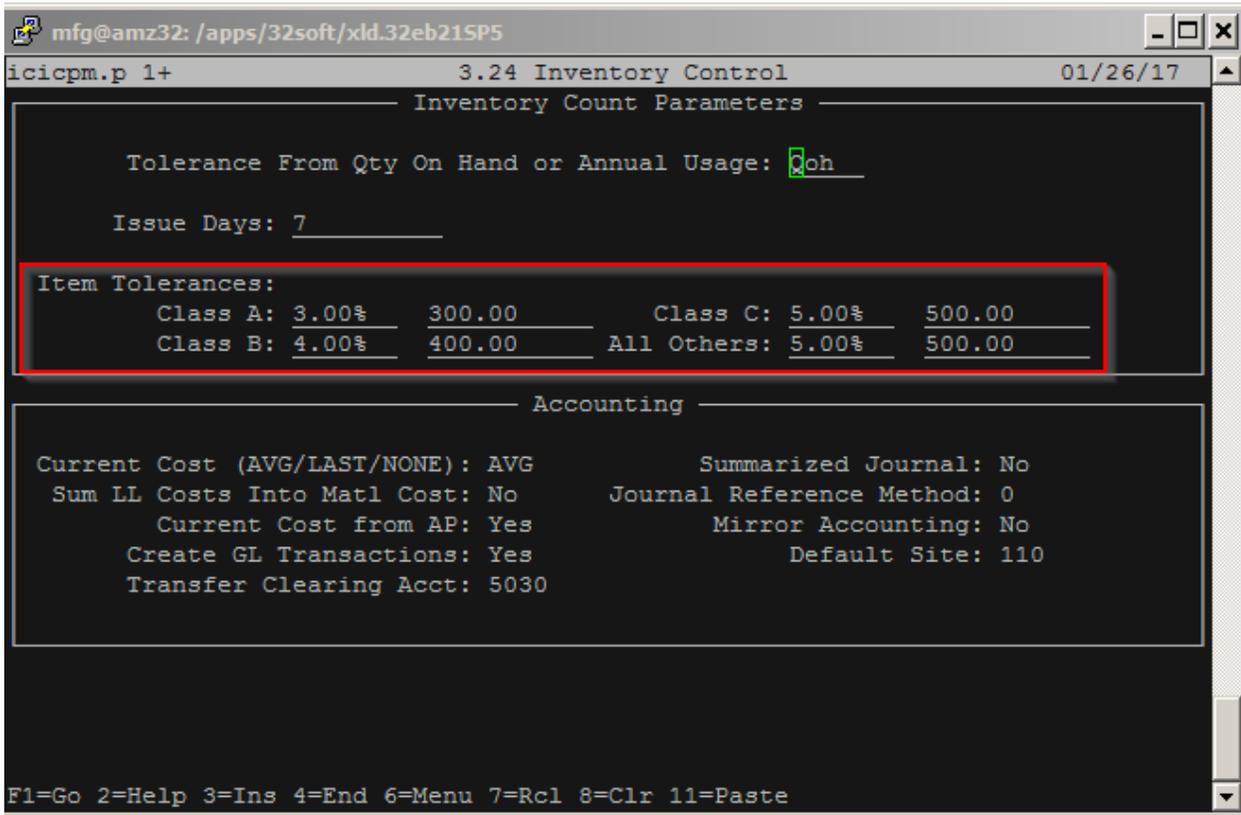

- Columns highlighted in green are writable.
- Columns highlighted in grey are read-only.

3. Analyze the data and enter count results in the green highlighted columns:

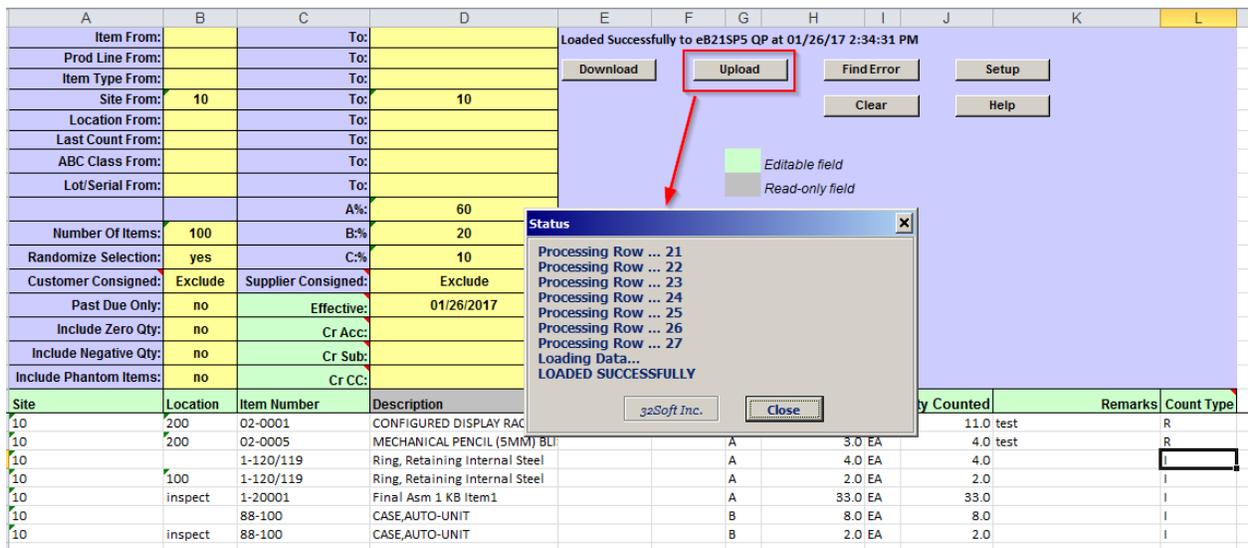

Site	Location	Item Number	Description	Lot/Serial	Reference	ABC	System Qty	UM	Qty Counted	Remarks	Count Type
10	200	02-0001	CONFIGURED DISPLAY RACK			A	10.0 EA		11.0	test	R
10	200	02-0005	MECHANICAL PENCIL (5MM) BLI			A	3.0 EA		4.0	test	R
10		1-120/119	Ring, Retaining Internal Steel			A	4.0 EA		4.0		I
10	100	1-120/119	Ring, Retaining Internal Steel			A	2.0 EA		2.0		I
10	inspect	1-20001	Final Asm 1 KB Item1			A	33.0 EA		33.0		I
10		88-100	CASE,AUTO-UNIT			B	8.0 EA		8.0		I
10	inspect	88-100	CASE,AUTO-UNIT			B	2.0 EA		2.0		I

Enter Quantity Counted (can copy-paste from the System Quantity column if same), Remarks if needed and Count Type (leave it I for Initial if quantity doesn't change or if the change is not out of tolerance, or enter R for Recount if you want to accept any quantity change)

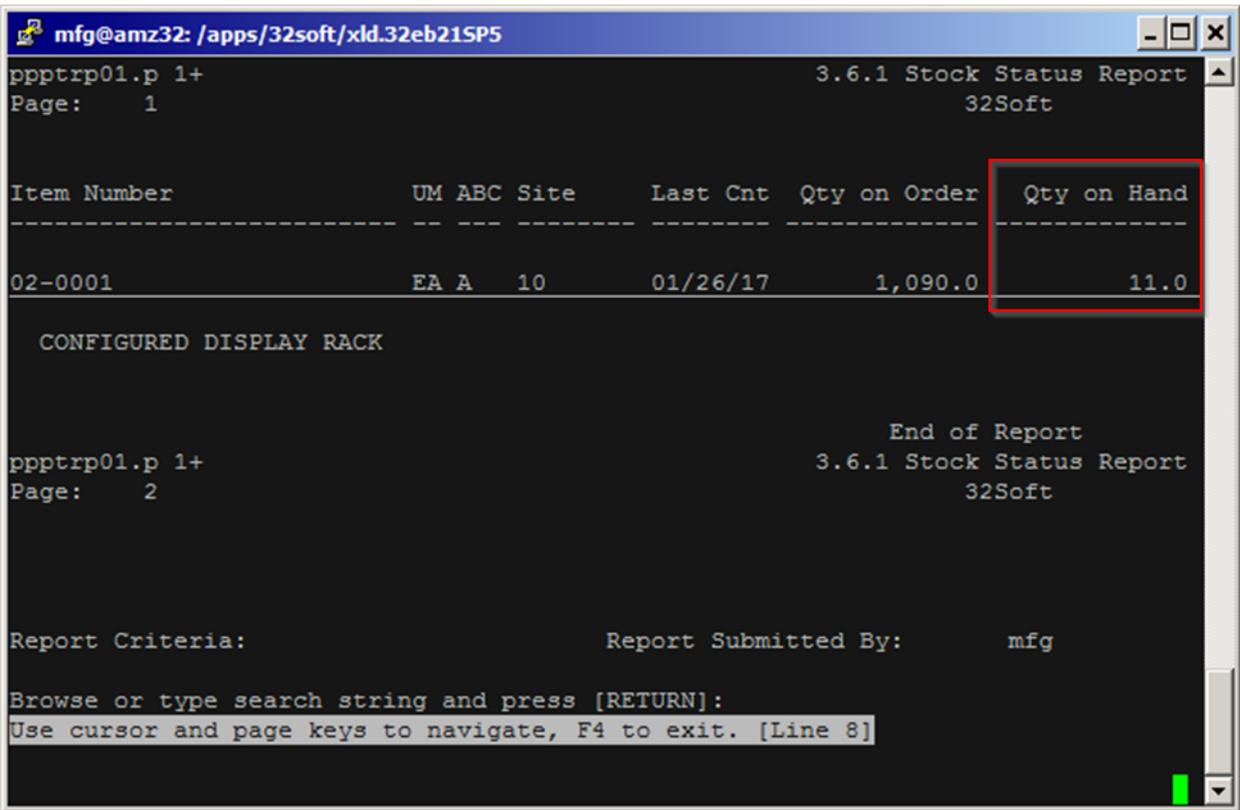

Note: Tolerances are set up by ABC class in Inventory Control File (3.24):

- When you are finished entering data, select the [UPLOAD] button and status will be displayed in pop up window with a message.

Note: as this is real time transaction, you can see the changes immediately in QAD once upload has been successful:

Error Checking

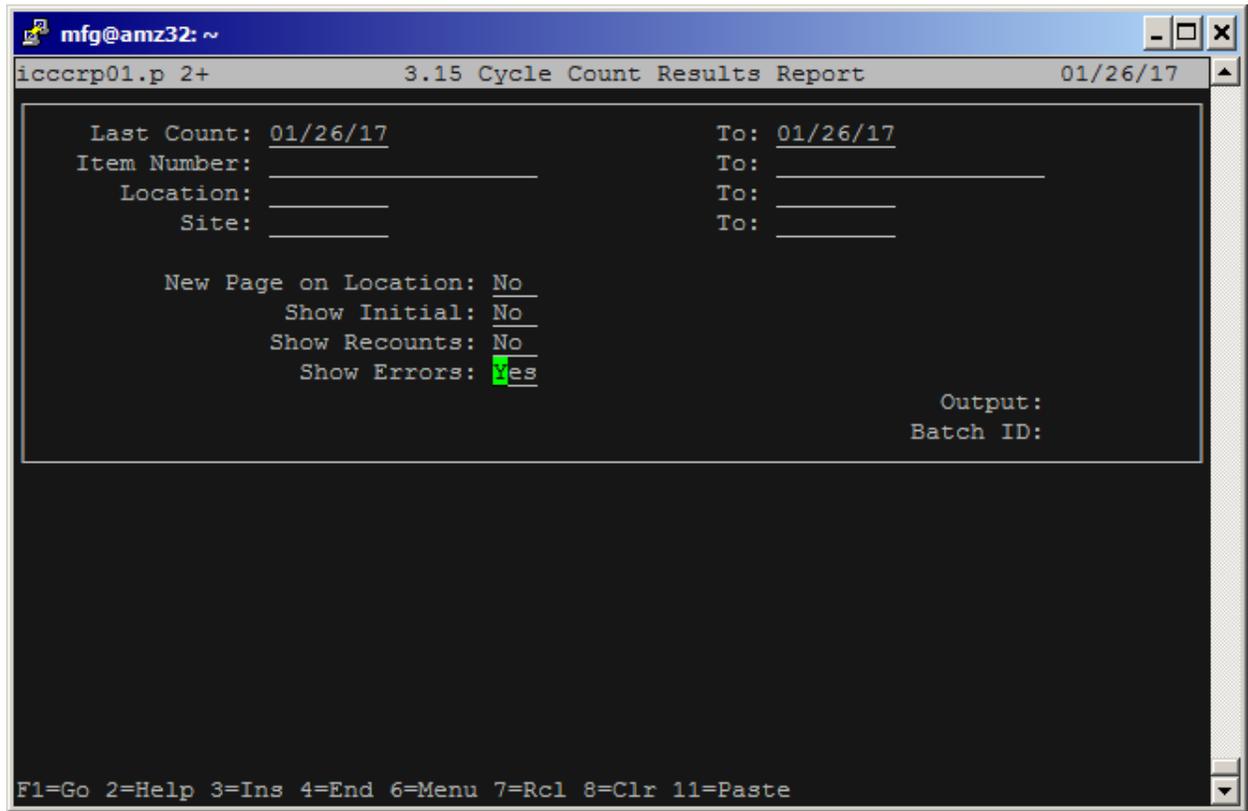

When you upload to QAD, a window pops up indicating the status of the upload. If there is an error, it will indicate that and the cell with the error is highlighted in red. If you mouse over the cell, it will display the error.

Site	Location	Item Number	Description	Lot/Serial	Reference	ABC	System Qty	UM	Qty Counted	
10	200	02-0001	CONFIGURED DISPLAY RACK			A	10.0	EA	20.0	
10	200	02-0005	MECHANICAL PENCIL (5MM) BLI			A	3.0	EA	5.0	ERROR: Count is out of tolerance
10		1-120/119	Ring, Retaining Internal Steel			A	4.0	EA	4.0	
10	100	1-120/119	Ring, Retaining Internal Steel			A	2.0	EA	2.0	
10	inspect	1-20001	Final Asm 1 KB Item1			A	33.0	EA	33.0	
10		88-100	CASE,AUTO-UNIT			B	8.0	EA	8.0	
10	inspect	88-100	CASE,AUTO-UNIT			B	2.0	EA	2.0	

You can use the [Find Error] button to navigate between cells with errors.

In this example the Count Type was set to I (Initial) and the Quantity counted was Out of Tolerance.

Note: By default the data loader does not accept a Initial count out of tolerance, it shows error, but it can be configured to accept out of tolerance and let QAD generate error count transactions (and in this case the inventory is not really updated), these errors can then be reported on using 3.15 Cycle Count Results Report (3.13.3 for EE):

Note: Data Loader validates also site security for the user, so if there are multiple sites and user tries to upload to a site where they are not set up, error will be displayed and upload will not occur for all the items.

You must correct the error before uploading again. If there is error in one cell, no records are uploaded.

Have Questions? Contact Us.

Now that you know everything is set-up correctly, you are on your way to a more productive QAD experience with Data Loaders! Thank you for your interest.

If you have any questions or need additional help, please do not hesitate to [contact](#) us.
